

## Feel the colour.

Vectron POS ColorTouch provides excellent performance combined with an innovative design. The display's interactive touch screen desktop guarantees rapid and flexible operation.

---

Large 12.1" colour display for extensive illustration

---

Intuitive operation through modern touch screen technology

---

TFT technology guarantees highest display quality

---

Fast, powerful 64 bit processor

---

Elegant, splashproof housing

---

Minimum space requirements for both standing and hanging installation

---

Numerous interfaces ensure you have extensive connection facilities

---

USB ports guarantee future compatibility and offer possibilities for data backup

---

„Embedded-Technology“ unites security and flexibility

---

Prepared for ECR networks and Back Office connections

---

## Huge, colourful touch screen

On 12.1" (30.7 cm), Vectron POS ColorTouch provides room for clearly arranged receipts, reports, customer information and information windows. The fully definable, branch-specific adaptation of layout and functions provides great flexibility for detailed table plans, order information, etc. The screen keyboard facilitates many placements. Mounted on the wall or positioned on the elegant, optional stainless steel stand, it fits into the ambience perfectly.

## Space-saving customer display option

The side of the flat POS ColorTouch housing facing the customer, provides integration opportunities for the optionally available customer display. Two lines with 20 characters each inform the customer about all invoicing transactions.

## Powerful 64-bit electronics

The POS ColorTouch relies on superior 64-bit technology. The increase in speed not only optimizes complex and calculation-intensive processing steps; the consequently employed 64-bit platform also increases the performance of ECR networks.

## Comprehensive interfaces

Fifteen interfaces are available for peripheral devices. Printers, scanners, card terminals, dispensing systems, scales, vending machines, cash drawers, clerk and waiter locks, supplemental keyboards, mice etc. are all supported. Two USB interfaces secure interconnection options to the newest peripherals.

## Flexible graphical user interface with intuitive icons

Icons, buttons and display fields allow to adapt the user interface to various branches. Alternating screen pages offer understandable input options for each operating step.

## Failsafe, manipulation- and virus-proof

The „Embedded Technology“ used in POS ColorTouch provides decisive advantages. Its hardware-oriented construction allows a particularly efficient use of the components. At the same time, the software guarantees the greatest possible flexibility and is immune to PC viruses. Interference-prone hard drives, unbuffered memory and loud fans do not exist in the POS ColorTouch.

## ECR network

POS ColorTouch is designed for use in mixed networks with all Vectron POS systems. Distributed tasks in the cash register network elevate the speed and increase data safety. Network-wide maintenance and configuration facilities stand for efficiency. Based on a 10/100 MBit Ethernet connection, the cash register network uses structures identical to a PC network.

## Simple data backup on a USB stick

The POS ColorTouch stores your sensitive ECR data in short intervals on a commercial USB stick. If necessary, data can be restored at the touch of a button. Besides the robust construction of the cash register, this provides you with double the security.

## Prepared for telecommunications and Back Office connections

Via the optional Vectron Commander communications software, you can control POS ColorTouch from the head office. You can read out turnover-, order- and working-hour data and transmit new PLUs, prices and cashier authorization to the cash register, worldwide. Via an open interface, Vectron Commander facilitates integration of merchandise management and CRM programs, time and attendance and special back and front office software.

## Remote maintenance and troubleshooting per RDT

The facilities for remote maintenance and troubleshooting round out the POS ColorTouch safety package. Problems can be analysed, operating errors and the cause of failures can be discovered and eliminated without any loss of time.
