

Stylish, fast, variable.

Vectron POS Vario offers the highest degree of flexibility, supports modern peripherals and convinces with its strong performance. It is the perfect all-rounder among the Vectron POS systems.

Large, infinitely adjustable 10.4 inch colour display with splash guard

Raised or flat keyboard for fast, clean working

Space-saving, convincing design

Powerful 64-bit electronics

Numerous interfaces

Graphical user interface with intuitive icons

Cross-sector software with sector-specific special functions

Failsafe, manipulation- and virus-proof by using „Embedded Technology“

ECR network based on the Ethernet industry standard

Simple data backup on a USB stick

Prepared for telecommunications and Back Office connections

Perfect pictures

The large, infinitely adjustable colour screen of the Vectron POS Vario sets new standards. Its effective background lighting, the integrated reflection suppression and the facility to equip it with a touch screen speak for themselves.

Touch screen option

With the touch screen equipment, screen and keyboard melt into one large input area. Fixed keys that can be operated practically blind in both, raised and flat version, are complemented by variable soft keys in the screen area. The optional integrated customer display with 2 x 20 characters offers comprehensive information to the customer.

Powerful 64-bit electronics

The POS Vario relies on superior 64-bit technology. The increase in speed not only optimizes complex and calculation-intensive processing steps; the consequently employed 64-bit platform also increases the performance of ECR networks.

Numerous interfaces

Fifteen interfaces are available for peripheral devices. Printers, scanners, card terminals, dispensing systems, scales, vending machines, cash drawers, clerk and waiter locks, supplemental keyboards, mice etc. are all supported. Two USB interfaces secure interconnection options to the newest peripherals.

Flexible graphical user interface with intuitive icons

Icons, buttons with pictures and symbols allow to adapt the user interface to various branches. Alternating screen pages offer understandable input options for each operating step.

Failsafe, manipulation- and virus-proof

The „Embedded Technology“ used in POS Vario provides decisive advantages. Its hardware-oriented construction allows a particularly efficient use of the components. At the same time, the software guarantees the greatest possible flexibility and is immune to PC viruses. Interference-prone hard drives, unbuffered memory and loud fans do not exist in the POS Vario.

ECR network

POS Vario is designed for use in mixed networks with all Vectron POS systems. Distributed tasks in the cash register network elevate the speed and increase data safety. Network-wide maintenance and configuration facilities stand for efficiency. Based on a 10/100 MBit Ethernet connection, the cash register network uses structures identical to a PC network.

Simple data backup on a USB stick

POS Vario stores your sensitive cash register data in short intervals on a commercial USB stick. If necessary, data can be restored at the touch of a button. Besides the robust construction of the cash register, this provides you with double the security.

Prepared for telecommunications and Back Office connections

Via the optional Vectron Commander communications software, you can control POS Vario from the head office. You can read out turnover, order and working-hours data and transmit new PLUs, prices and cashier authorization to the cash register, worldwide. Via an open interface, Vectron Commander facilitates integration of merchandise management and CRM programs, time and attendance and special back and front office software.

Remote maintenance and troubleshooting per RDT

The facilities for remote maintenance and troubleshooting round out the POS Vario safety package. Problems can be analysed, operating errors and the cause of failures can be discovered and eliminated without any loss of time.
